

Firewater: Book Two

INSORCK

Dan Farrell

Firewater is the name that was given by native Canadian Indians to the powerful rum that was offered by the Hudson's Bay Company in exchange for pelts. To ensure they were getting the genuine liquor, Indian trappers would set a spoonful alight before accepting it in trade.

The Firewater novels recount a journey undertaken by mismatched twin brothers, that sets out as a straightforward business venture but develops into a troubled voyage bound for disaster.

Firewater: Book Two: INSORCK follows the Kelly twins as they continue their cruise through France, blissfully unaware that they are carrying deadly weapons hidden in the starboard hull of their catamaran. In hot pursuit is Lucretia, Supreme Commander of a sinister international organization with its roots in the mediaeval crusades. With her, is Assistant Superintendent Alfred Ramsbottom, head of the ultra-secret M(Matilda) branch. Meanwhile, enigmatic secret agent Violet is trying to thwart evil Lucretia. Bent on reclaiming their stolen weapons, a dissident band of IRA terrorists is also tracking the yacht Firewater. When the CIA set out to recover the nuclear bombs, suspecting they may be aboard the Irishmen's barge Pandaemonium, some dramatic events take place.

Firewater: Book Two: INSORCK is available on application to firewater@sympatico.ca for the price of 25 Dollars Cdn. plus shipping and handling.

This sequel to *Firewater: Travelling with Terror* questions the legitimacy of capitalist doctrine and the methods used to sustain our "democratic" society. Despite a few grammatical glitches in the author's editing, *Firewater: Book Two: INSORCK* is an entertaining yarn with spectacular episodes that will leave the reader in doubt about the final outcome until it comes to a satisfying dramatic conclusion.
